Central

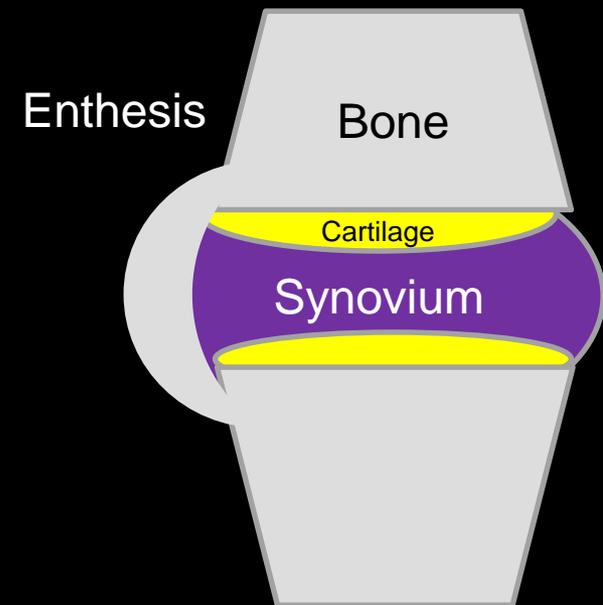

Discriminating features

- Which part of the joint is involved?

Watt I *Basic differential diagnosis of arthritis. Eur Radiol. 1997 7:344–351*

- Target joint approach

Resnick D *Diagnosis of Bone and Joint Disorders*

Objectives

- Learn the **target joint approach** for Hand Arthritis
- Learn how to recognize features of **AS**
 - New York criteria

The **target joint** approach for Hand Arthritis

OA

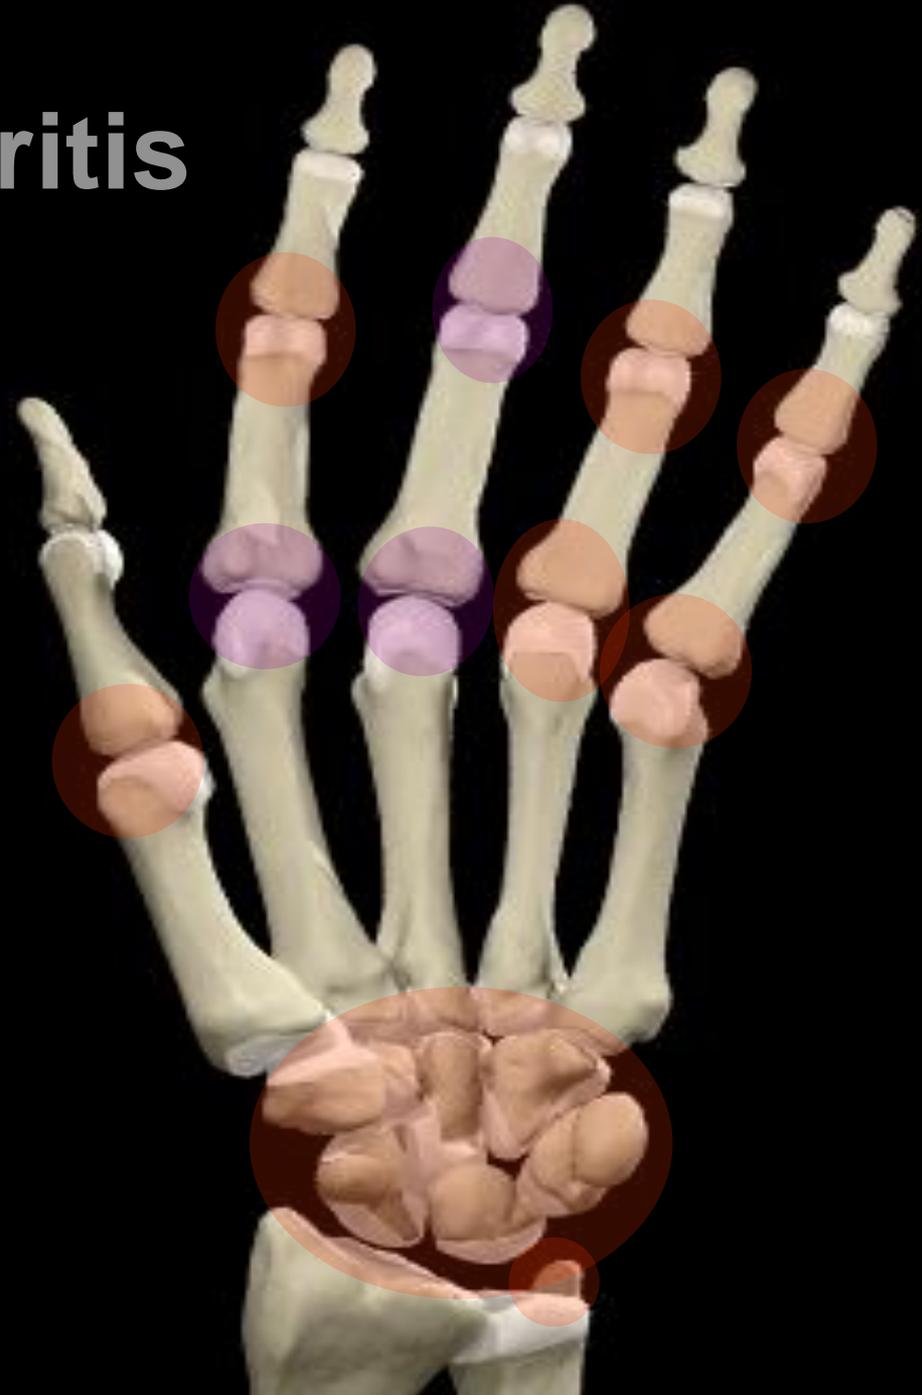

RA

CPPD

Rheumatoid arthritis

- **DIPJ erosions uncommon**
- **3 target joints**
- **radial aspect erosion**

Peri-articular osteopenia
Soft tissue swelling
Erosions
Joint space narrowing

RA

6

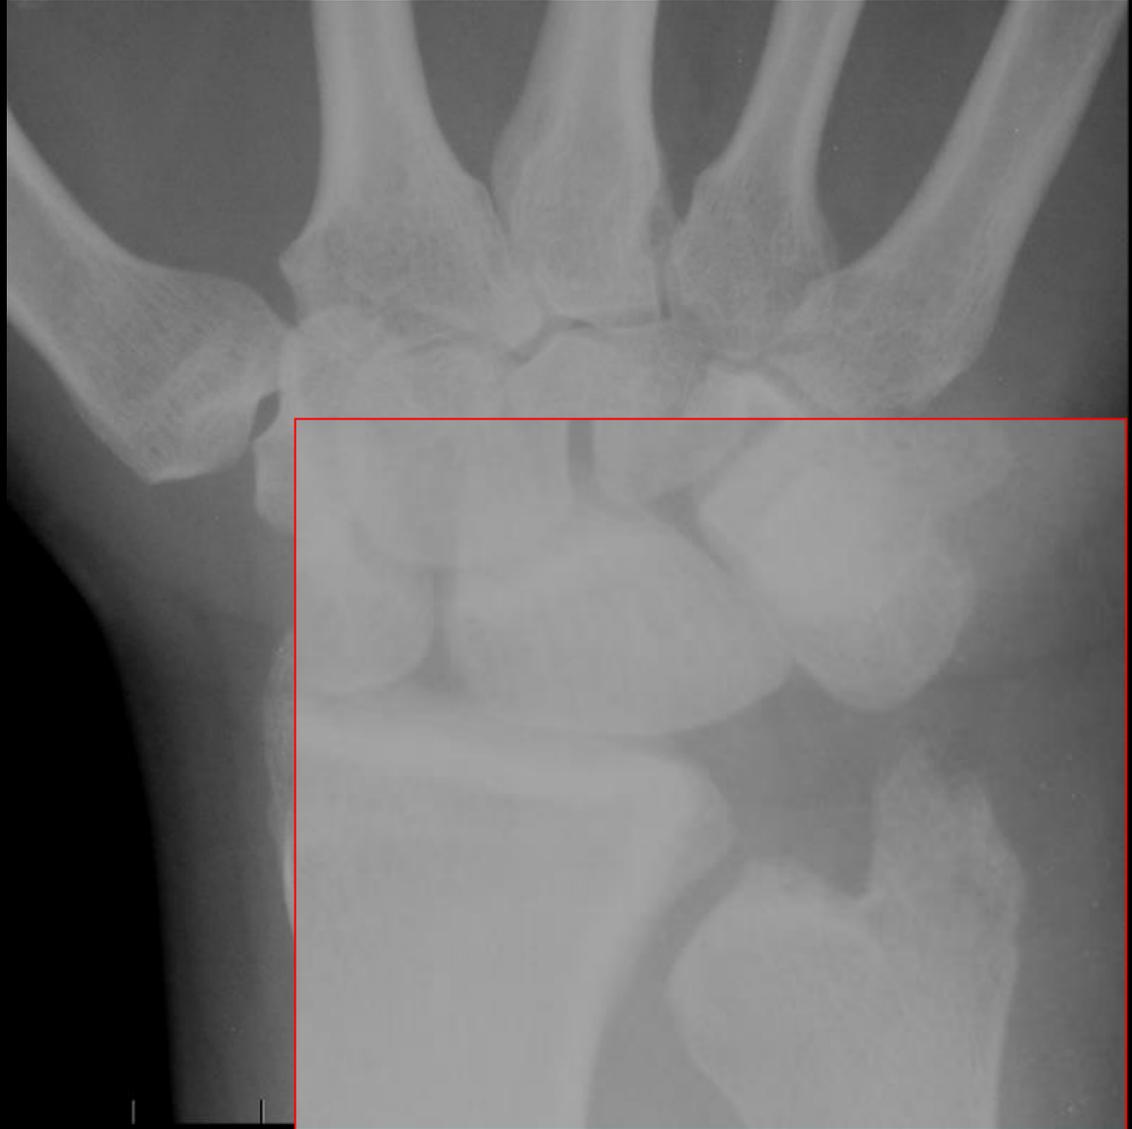

Subluxations

Swan neck and boutonniere

Z thumb

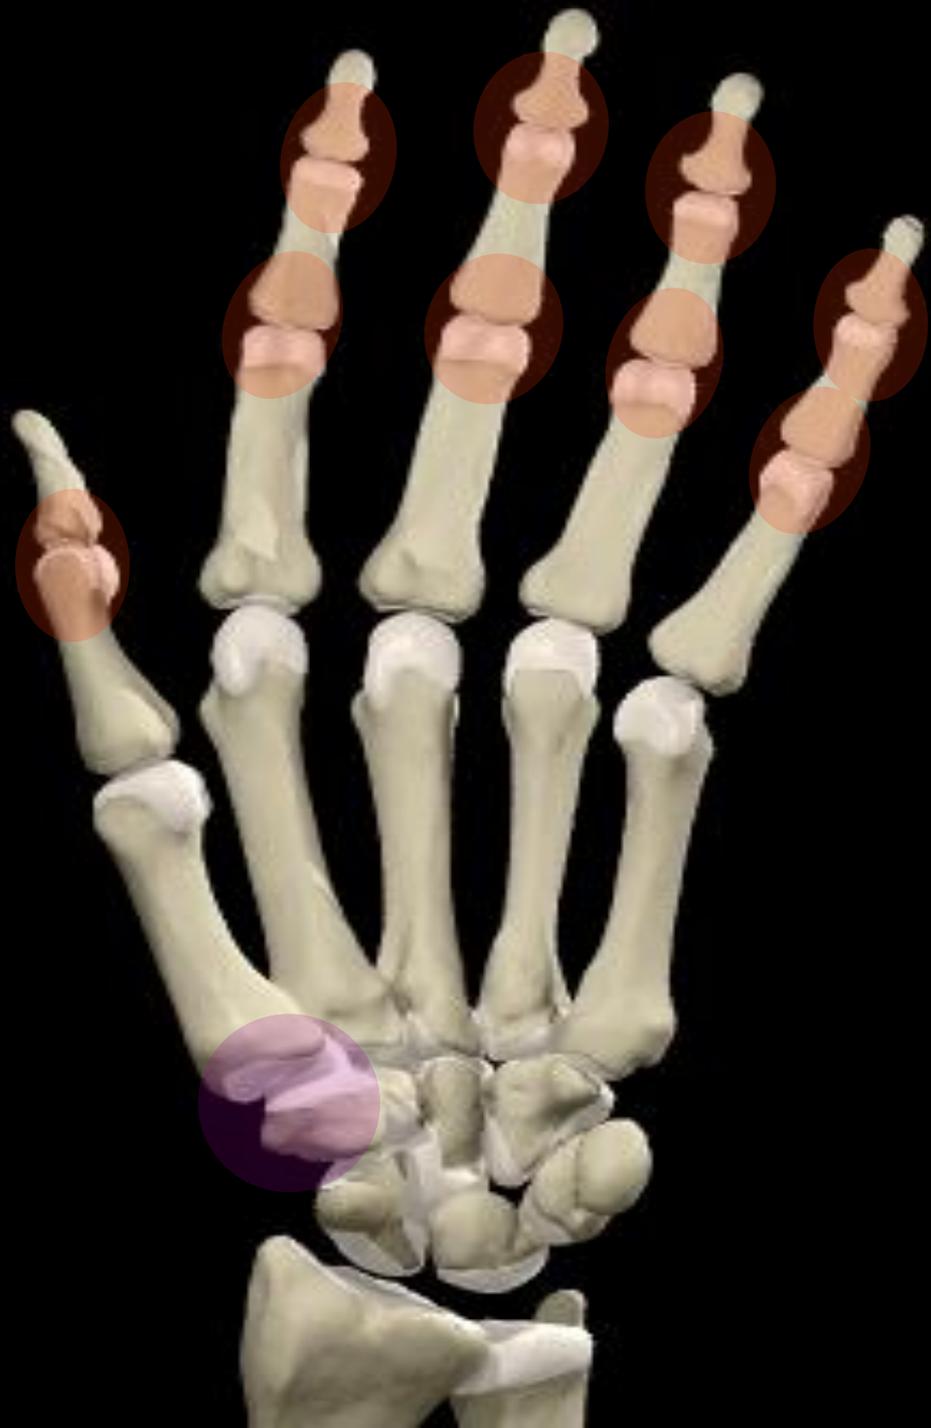

Early involvement RA

Osteoarthritis

PIP and DIP > MCP

OA

Joint space loss

Subchondral sclerosis

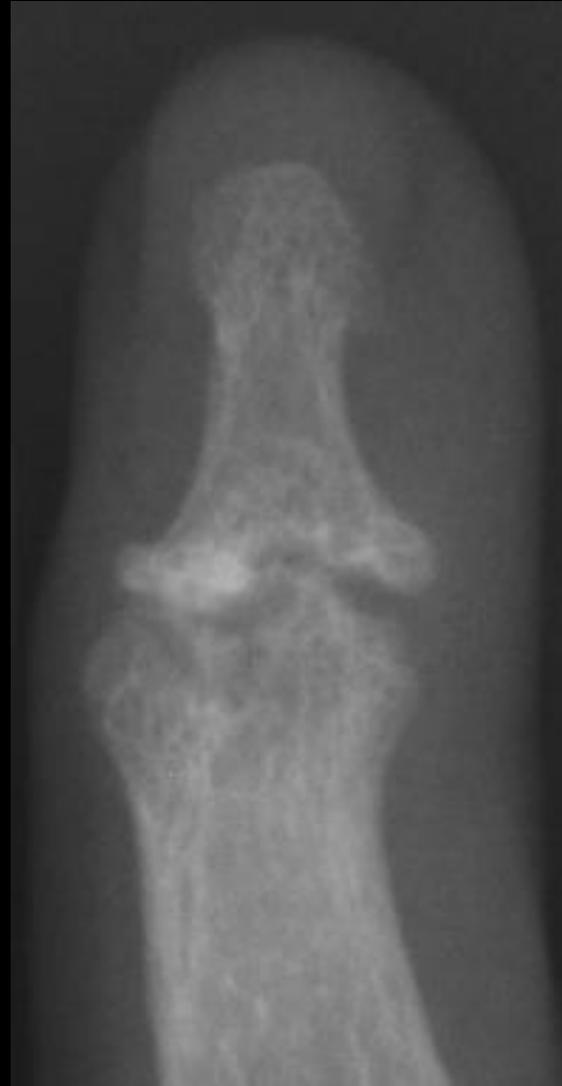

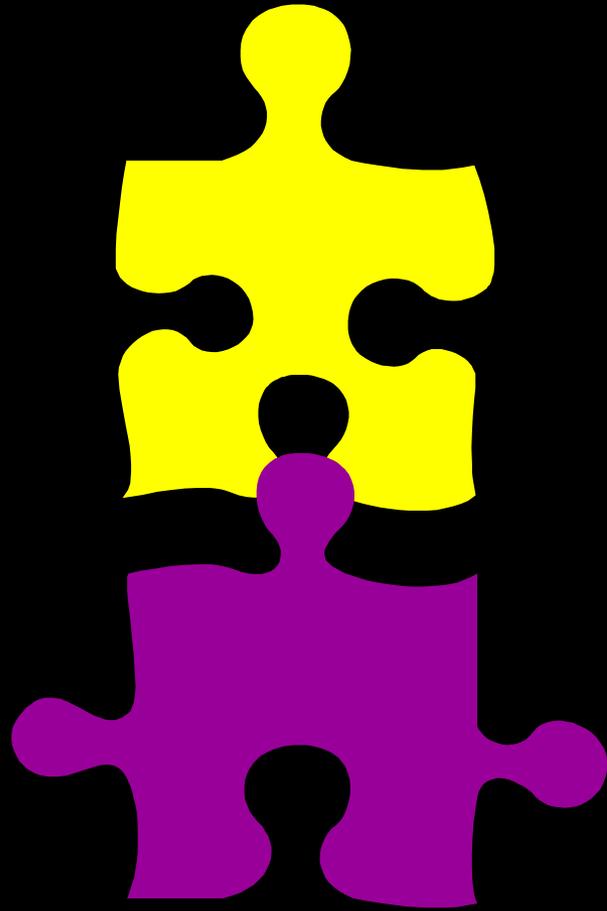

Erosive OA

- Form of OA + erosive/inflammatory component
- Similar distribution to OA
- F:M~12:1, typically postmenopausal, pts.RF (-)
- **Dyslipidemia** may be implicated
- Mimics inflammatory arthropathies: Psa or RA
- Soft tissue swelling, subchondral collapse
- **Gull wing** erosion

Gull wing erosions

Interdigitation

Erosive OA

Gull wing erosion

Ankylosis

Erosive OA

Psoriatic arthritis

PIP and DIP > MCP

New bone formation

Patterns

- Multiple DIPJs
- Arthritis mutilans
- Resembles RA
- Resembles AS with SIJ/Spondylitis

Psoriatic arthritis

Mouse ear erosion

Psoriatic arthropathy

Rheumatoid pattern

Arthritis mutilans

Pencil-in-cup deformit

Opera glass hand

Main en lorgnette

Arthritis mutilans

Psoriasis

vs.

Erosive OA

- Whiskering
- New bone
- Mouse ears

- Interdigitation
- Central collapse
- Gull wings

CPPD

CPPD

- Ageing process, usually asymptomatic
- Diagnosis by chondrocalcinosis
- 2nd/3rd MCP
- Associated with hyperparathyroidism, hemochromatosis

CPPD

CPPD

CONCLUSION

- Few diagnoses to consider
- Demographic features
- **Which part of the joint is involved?**
synovium, cartilage or bone?
- **Target approach**

Enthesis diseases

Sacroiliitis

Μέθοδος

Πρώτα ελέγχουμε τη σαφήνεια του υποχόνδριου οστού

Μετά διαβρώσεις (πρώτα λαγόνια μοίρα) – ψευδο-διεύρυνση

Τέλος, σκλήρυνση και αγκύλωση

Κριτήρια φυσιολογικών SIJ

1. Ομοιόμορφο εύρος αμφοτερόπλευρα
2. Διατήρηση της σκληρυντικής υπαρθρικής γραμμής

Στις SIJ ερευνούμε

1. το εύρος του μεσάρθριου
2. παρουσία και τύπο διαβρώσεων
3. υπαρθρική σκλήρυνση
4. παρουσία και τύπος γεφύρωσης

Sacroiliitis

grade I: some blurring of joint margins - suspicious
grade II: minimal sclerosis with some erosion

Grading

I

II

Grading

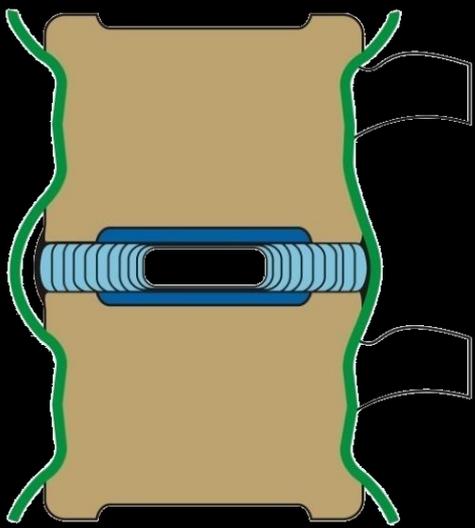

grade III: definite sclerosis on both sides of joint
severe erosions with widening of joint space with
or without ankylosis
grade IV: complete ankylosis

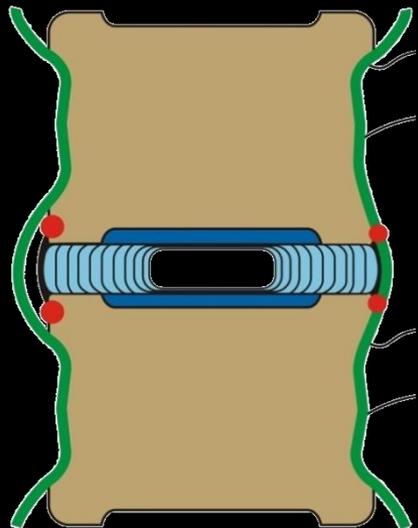

III

IV
